

Ford Dealership Welcomes Experienced Body Shop Manager

April 2011 -- Les Jacobs Ford Mercury in Cassville welcomes Chad Haddock as their new Body Shop Manager. "I look forward to meeting everyone in the area," said Haddock. "I have enjoyed working with the staff at Les Jacobs for years as a claims adjuster, and really enjoyed the atmosphere at the dealership, so it is a privilege to work within the 'family' here. With John and Ron's years of experience and my own experience, the entire repair process will be convenient for our customers, which includes handling all the necessary paperwork with your insurance company."

Chad brings experience in collision and body shop repair as well as five years' experience as an insurance claims adjuster. "We are excited to have Chad join our staff," said Darrin Jacobs, general manager. "He has experience on both sides of the collision and repair industry, from actual repair to processing the paperwork, and will be a great asset to our customers. We've known Chad for many years professionally, so having him join our staff is a welcome addition!"

Haddock started working in a body shop at 17 and has been in the industry ever since. His passions are muscle cars, hunting and fishing. The Haddocks live in Neosho, MO, and have three children, Shane, Dylan, and Ella. Chad's wife Amy is a dental assistant for a local dentist in Neosho. They are members of the Baptist Church. Although the Haddocks live in Neosho, Chad grew up on a farm close to Pierce City and is proud to call southwest Missouri home.

Les Jacobs Ford Mercury Professional Auto Body Repair is open Monday- Friday 7:30am-5:00pm and on Saturday 7:30am-2:00pm. For quality auto body repair Les Jacobs Ford Mercury uses exclusive PPG paints, computer-assisted color matching, color correction lighting, a semi-downdraft paint baking booth, a Noram Paint Booth, and Gravity Feed Paint equipment. They offer free estimates on foreign and domestic vehicles, frame straightening, alignment, windshield repairs, and free insurance bids for any needed repairs.
